CARRIER OBJECTIVE

As an enthusiastic BCA student, I am looking for an opportunity in IT and software development to apply my skills in programming and problem-solving while growing professionally and contributing to the company's success.

EDUCATION

Bachelor of Computer Application

Shrimati Indira Gandhi College, Trichy

(2023 - Present)

The girl's higher secondary school, Srirangam

(2021 - 2023)

Kalaivaani matriculation school, Srirangam

(2016 - 2021)

PROJECTS

Online House Renting System – Built using Java

An Online House Renting System developed in Java is a web-based application that streamlines the process of renting properties by connecting house owners with potential tenants. This system offers a user-friendly interface, enabling efficient property searches, bookings, and management.

Email Slicer – Built using Python

An Email Slicer is a simple Python application that extracts the username and domain from an email address. This project is an excellent starting point for beginners to practice string manipulation and user input handling in Python.
